### Skills

#### Programming Languages

- JAVA
- C#
- OOP
- Kotlin
- JavaScript
- HTML
- CSS
- Python

#### Development

- Android Development
- Web Development
- Desktop Development

#### Databases

- MySQL
- Firebase Real Time Database
- MongoDB

#### Other

- Solving problems
- Working with APIs
- SQL
- NoSQL
- Unit testing

### Languages

- Hebrew ★★★★★
- English ★★★★★

### Summary

My name is Saar Yaniv and I'm 25 years old from Haifa

I'm a self-learner, motivated to learn new things and utilize my skills in my first job.

I like to think big and try to see the bigger picture when starting a project or solving a problem.

By being a team player, one of my skills is helping others which contributes to solving the task and expanding both my knowledge and the people I work with.

### Projects

#### • Android app for meeting new friends

An App based on shared interests and living areas, by using Firebase's real-time database for chat and for the data stored. This App was my final project in the second year of my studies.

#### • Android app for getting notifications when a new grade was uploaded

An App based on web scraping. By entering my School's website using my login details, and utilizing a service that refreshes every 10 minutes to check if a new grade was uploaded, and if so it sends a notification to my phone.

#### • Android app for Currency exchange

The app fetches currency data relative to the Euro from an API called Exchangerates.io upon launch, using this data to calculate the exchange rates between the two currencies and display the result.

### Education

- **Practical Software Engineering Diploma** *October 2021 - June 2023*
  - The National School of Practical Software Engineering at The Technion, Haifa
  - GPA 90
- **High School - Matriculation certificate** *September 2012 - June 2016*
  - Hamoshava High School, Zichron Ya'akov
