Skills

Programming Languages
- JAVA
- C#
- OOP
- Kotlin
- JavaScript
- HTML
- CSS
- Python

Development
- Android Development
- Web Development
- Desktop Development

Databases
- MySQL
- Firebase Real Time Database
- MongoDB

Other
- Solving problems
- Working with APIs
- SQL
- NoSQL
- Unit testing

Languages

- Hebrew ★★★★★
- English ★★★★

Summary

My name is Saar Yaniv and I'm 25 years old from Haifa

I'm a self-learner, motivated to learn new things and utilize my skills in my first job.
I like to think big and try to see the bigger picture when starting a project or solving a problem, and also like helping others, By doing so they are learning and I am also.

Projects

- **Android app for meeting new friends**

  An App based on shared interests and living areas, by using Firebase's real-time database for chat and for the data stored. This Project is for my final Project, during my studies.

- **Android app for getting notifications when a new grade was uploaded**

  An App based on web scrapping, for entering to my School's website with my login details, and using a service that runs every 10 minutes to check if a new grade was uploaded, and if so it notifies my phone.

- **Android app for Currency exchange**

  The app fetches currency data relative to the Euro from an API called Exchangerates.io upon launch, and I use this data to calculate the exchange rates between the two currencies.

Education

Practical Software Engineering Diploma   *October 2021 - June 2023*
- At The National School of Practical Software Engineering at The Technion, Haifa
- GPA 90

High School - Matriculation certificate   *September 2012 - June 2016*
- At Hamoshava High School, Zichron Ya'akov
